

# Knowledge & Skills: Infection Control

## Infection Control Workshop:

This workshop will cover the use of safe, effective and ethical infection prevention and control measures which is an important component of nursing care. Nurses are expected to be aware of applicable CNO standards, relevant legislation, best practices and organizational policies related to infection prevention and control.

## Learning Topics:

- The chain of infection & ways to interrupt the spread of pathogens
- Stages of infection
- Medical Asepsis
- Hand hygiene
- Personal Protective Equipment (PPE)
