

Nursing Knowledge: Cannabis (Marijuana)

Cannabis Use & Patient Support Workshop:

The legalization of cannabis has had specific effects on healthcare. For IENs, interacting with clients and community in the context of legalized marijuana use may be unfamiliar. This workshop will help familiarize nurses with cannabis use and appropriate supports for your professional readiness.

Learning Objectives:

- Comprehend the changes in laws and regulations
- Apply the cannabis policy and procedure into practice
- Name the required nursing assessments, orders, consults, and documentation
- Describe the types of cannabis products and their effects
- Identify the information to provide to patients and families
