

Nursing Skills: Documentation

Documentation Skills Workshop:

Nurses are responsible and accountable for quality documentation practices to support safe, client-centred care. As an RN/RPN, your documentation reflects the quality of the nursing care provided and is a critical component of the interprofessional documentation in the client's health record.

This workshop provides nurses with knowledge and skills to fulfill expectations for appropriate documentation in their practice.

Learning Topics:

- Communicating from clients' perspectives
- Legal investigations
- Communication between health care providers
- Meeting legislative requirements
- Quality improvement and research
