

Nursing Knowledge: HIV Care

Understanding HIV Workshop:

This workshop shares information, analysis and resources related to HIV in the Canadian context and healthcare system. Through this workshop, nurses are supported in understanding the impact of stigma and other societal factors on HIV care. Understanding social determinants of health and their impact on HIV infection is a key objective in this session.

Learning Topics:

- Transmission in Canada: testing, prevention, harm & risk reduction
- Treatment
- HIV and pregnancy
- HIV disclosure and the law
- HIV stigma and discrimination: creating a safe environment
- Resources for you, your patients, and communities
