

## Nursing Skills: IV Therapy

### IV Workshop for IENs:

As a nurse, it is important to continually develop nursing competency and update skills to reflect current practice expectations. This 2-part workshop on IV therapy, lead by an experienced educator and qualified nurse, will support building technical skills and knowledge to meet best practice standards.

### Learning Outcomes:

- Review the purpose of IV Therapy
- Detail the importance of asepsis as it relates to vascular access
- Explore the care and management of peripheral vascular access therapy
- Discuss the most common complications of peripheral vascular access therapy and interventions required
- Identify the types of central vascular access
