

Nursing Knowledge: Oncology

The Oncology Workshop:

This workshop will help IENs build understanding on how Oncology functions in the Canadian context. Guided by an expert and experienced nurse educator, participants in this workshop will gain knowledge and skills to work in cancer care.

Learning Topics:

- How cancer care is delivered within the Ontario Health Care System
- Primary treatment modalities and their impacts
- Key nursing responsibilities in cancer care
- Scenario-based analysis in an acute care setting, with potential nursing interventions
